AI AUTOMATION · 2026

Put the busywork on autopilot.

Four AI automations that answer leads faster, clear the inbox, chase unpaid invoices and talk to website visitors around the clock.

- Speed-to-lead voice agent
- Website chat agent
- Invoice follow-up
- Inbox triage

Built in n8n, on your own accounts

THE PROBLEM

Revenue leaks through the jobs nobody has time for.

Most growing businesses don't lose deals on price. They lose them in the gaps between a customer reaching out and someone getting round to it.

Leads wait hours

A form comes in at lunchtime and gets a call back tomorrow. By then the lead has called someone else.

Websites go quiet

Visitors with one quick question find only a contact form, and leave without saying a word.

Invoices go unchased

Money already earned sits uncollected because writing awkward reminder emails is nobody's favourite job.

Inboxes overflow

Leads, support questions, bills and spam arrive mixed together, and the important ones get buried.

Four automations. **Each one pays for itself.**

Each automation is a workflow we build in n8n and connect to the tools you already use. It runs in the background, and you stay in control of anything that goes out.

01 Speed-to-lead AI voice agent

Calls new form and ad leads back within a minute, answers basic questions and books the appointment.

02 Website lead chat agent

Answers visitor questions from your own FAQ and price list, qualifies them and offers a booking link.

03 Invoice & payment follow-up

Sends polite, AI-written reminders on day 3 and day 10, and alerts the owner on day 20.

04 AI inbox triage

Sorts every email into lead, support, billing or noise, drafts replies and flags what's urgent.

Your leads get a call back **in under a minute.**

Speed wins the deal. The moment a lead fills in your form, an AI voice agent calls them, confirms what they need and books the appointment.

- 1 A form or ad lead arrives and is saved to your CRM.
- 2 Only leads who agreed to be contacted get a call.
- 3 The AI agent introduces itself as an assistant and qualifies the lead.
- 4 Booked calls land in your calendar with an SMS confirmation. The rest go to sales on Slack.

BEST FOR

Home services, solar, insurance, real estate, car dealers: anyone running paid ads to a form.

Your website talks back, even at 2 a.m.

A contact form is a dead end. This chat agent knows your services, prices and FAQs, answers instantly and turns the visitor into a booked call.

- 1 A visitor asks a question in the chat on your site.
- 2 The agent answers from your own FAQ and price list, nothing made up.
- 3 It asks for name, email and need, and saves the lead to your CRM.
- 4 It checks your calendar and offers a booking link before they leave.

BEST FOR

Clinics, law firms, real-estate agents, coaching businesses and local service companies.

Collect the money **you've** already earned.

Every morning the workflow checks your invoice sheet or accounting tool, finds anything past due and sends a reminder written for that client. When they pay, the reminders stop on their own.

- 1 Day 3:** a friendly reminder with the amount and payment link.
- 2 Day 10:** a firmer, still professional follow-up.
- 3 Day 20:** the owner gets a Slack alert to make a personal call.

BEST FOR

Agencies, consultants, accountants and any B2B business with Net-30 invoices. The easiest first automation, because it pays for itself in cash.

A sorted inbox **before** your first coffee.

Every new email is read the moment it arrives. AI decides what it is and does the first step for you, so the important messages never get buried.

- 1 Lead:** labelled and posted to your sales team on Slack.
- 2 Support:** a draft reply is waiting in Gmail for you to approve.
- 3 Billing:** labelled and filed for finance.
- 4 Noise:** newsletters and promotions are cleared out of the way.

BEST FOR

Founders, sales teams, support desks, real-estate and recruitment offices. You still approve what goes out.

From first call to running automation.

STEP 1

Map the process

We look at how leads, email and invoices flow today and pick the automation with the clearest return.

STEP 2

Build in n8n

We build the workflow on your accounts and connect your CRM, inbox, calendar and sheets.

STEP 3

Test with sample data

Every path is tested with sample records before it touches a real customer.

STEP 4

Launch & monitor

We switch it on, watch the first runs closely and hand over clear documentation.

BUILT RESPONSIBLY

Safeguards in every build

- ✓ A human approves anything sensitive before it goes out.
- ✓ We only contact people who opted in, and honour every stop request.
- ✓ Voice and chat agents always say they are AI assistants.
- ✓ Your data stays in your own accounts. You own everything we build.

WORKS WITH YOUR STACK

Built on the tools **you already use.**

No rip-and-replace. We connect the systems you already pay for, so your team keeps working the way it does today.

AUTOMATION & AI

n8n

OpenAI

AI voice agents

Text classification

SALES & CRM

HubSpot

Zoho CRM

Google Calendar

Website forms & ads

COMMS & DATA

Gmail

Slack

Twilio SMS

Google Sheets

Start with one automation, then connect them. A lead that comes in through chat or a form can be called, booked, followed up and invoiced by the same system.
